Education

Cornell University Ithaca, NY

Bachelor of Science in Computer Science *Expected Graduation May 2026*

Current GPA: **3.8**

Relevant Coursework: Object-Oriented Programming & Data Structures, Functional Programming, Backend Development, Language Retrieval, Computer Organization, Embedded Systems, Linear Algebra, Discrete Structures, Calc I-III

Technical Skills

Languages: Python, Java, C, OCaml, JavaScript, HTML, CSS, Bash, PowerShell,
Developer Tools: AWS, GCP, SQLite, Git, GitHub, Postman, Visual Studio Code
Frameworks: Flask, Docker, React, NextJS
Libraries: OpenCV, Selenium, NumPy, Matplotlib, Scikit-learn

Experience

Software Developer January 2024 – Present

Cornell Cup Robotics *Ithaca, NY*

- Ported existing vision system to new XRP architecture
- Utilized OpenCV to enhance the vision system's performance and reliability
- Tracked the robot's orientation and direction based on AprilTag data for precise navigation
- Collaborated with team to integrate the updated vision system with the robot's control system

Cashier and Floor Manager July 2018 – Present

Shiva Bazaar *Norwood, MA*

- Learned professional customer service and supply chain knowledge
- Built essential relationships between supplier and vendor

Projects

↗ **Exercise Search Engine** | *Python, JavaScript, HTML, CSS*

- Developed a search engine utilizing SVD to find similarity between query and result exercise
- Implemented dropdown and ad-hoc search to find exercises based on query and filters
- Scraped multiple fitness websites using Selenium to build dataset
- Containerized the application via Docker and deployed to AWS ECS using Fargate launch type

Accelerometer-Driven Game Controller | *C, Python*

- Developed a game controller in C using the FRDM-KL46Z microcontroller
- Utilized the onboard accelerometer to detect tilt inputs on the x-axis
- Designed a Doodle Jump game using Pygame, where accelerometer inputs were sent via UART communication

Database Management System | *OCaml*

- Created tabular data structure that can take in CSVs and provide analysis on the data
- Supports mapping, filtering, and reducing with custom functions on individual columns in the table
- Utilized functional paradigms such as recursion and pattern-matching

↗ **Etch-a-Sketch** | *JavaScript, HTML, CSS*

- Developed a stylized, pixelated canvas where users can draw using their cursor
- Designed a UI where users can change grid size, cursor mode, and color choice

Maze Navigator | *Java*

- Wrote, tested, and optimized algorithms to navigate graphs using several key data structures
- Utilized synchronization to minimize CPU usage while concurrently running GUI and back-end
